

**TRANSFORMING**  
health care delivery  
in the real world  
in real time

Optimize every moment™ **Clairvia**®

# First: Focus on the patient

**High-value health care moves each patient to his or her desired level of wellness as effectively and efficiently as possible.** To achieve real-world transformation, **Clairvia® Care Value Management™ (CVM™)** starts by focusing on the patient's current condition and needs and the resources required to move the patient to the next care outcome, creating an evidence-based platform for collaborative care.

***“Real-time patient demand is vital to providing quality, cost-efficient healthcare.”***

*- Dr. Robert Dent, VP of Patient Care Services  
Midland Memorial Hospital*

# Empower nurse management to optimize the patient experience

**As the physician determines the quality of treatment decisions,** the nurse is the main determinant of how the patient experiences his or her treatment. Clairvia CVM transforms nursing staff allocation by integrating workforce management systems with clinical information systems to match individual nurse skills to individual patient needs.

***“Patients appreciate the unified, well-planned team approach to their care.”***

***- Carol Wahl, Vice President of Patient Care Services  
Good Samaritan Hospital***

# The point of care is the point of maximum impact

**When you match the right nurses to the right patients at the right times,** you are perfectly positioned to optimize care outcomes. Clairvia® CVM™ delivers key data to the point of care, in real time, empowering caregivers to achieve superior results with maximum efficiency.

***“Clairvia® CVM™ provides the resources needed  
to move patients to their next level of wellness.”***

***- Jill Mason, Chief Nursing Officer  
Blessing Hospital***

# The Transformation: From Workforce Management to Care Value Management

**Clinical information systems record patient needs and expected courses of care.** Workforce management systems store nurse competency, skill and availability information. Clairvia CVM bridges the value gap by integrating these two data sets at the point of care, in real time, transforming what was once mere staffing into patient resource assignment, so that each patient is assigned the caregivers best able to meet his or her unique needs.

***“The Clairvia suite enables data-driven solutions at all levels.”***

*- Dr. Pamela Cipriano, University of Virginia Health System*

# Optimize care, optimize cost, optimize value

**Outcome-focused, real-time patient assignment** not only improves quality of care while holding costs in check, it empowers organizations to measure the value the workforce brings to both the efficiency of care and the patient experience.

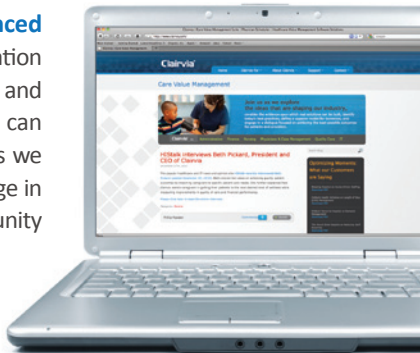

***“We reduced overtime costs while supporting safer, higher-quality staffing and increasing staff satisfaction.”***

*- Dr. Carol Porter, Chief Nursing Officer and Senior Vice President for Nursing  
Mount Sinai Hospital*

# Join the transformation

The results our clients have experienced emerged, in part, from an ongoing exploration of the ideas that are shaping our industry and the evidence upon which real solutions can be built. Join us at [www.clairvia.com](http://www.clairvia.com) as we share our experiences and insights, engage in an informed dialogue and foster a community committed to transformational change.

**Clairvia**<sup>®</sup>  
Optimize every moment™

**Clairvia Care Value Management is a comprehensive suite of software solutions:**

Staff Manager ■ Demand Manager ■ Patient Progress Manager ■ Care Cost Manager  
Outcomes-Driven Patient Acuity ■ Demand-Driven Patient Assignment  
ShiftAlert Mobile ■ MobileConnect ■ Care Value Analytics
